## Band Concert Rendered Sunday In Local Park

First Concert of the Season  
Delights Good Crowd

Redcliff Citizens were greatly delighted Sunday evening when they were entertained to a splendid Band Concert rendered by the local band under the leadership of Mr. Harry Turner, at the New Park.

About forty cars were parked around three sides of the Park and a good crowd of pedestrians had also gathered to enjoy this the first open air concert rendered by the Redcliff Citizens Band. Seats had been arranged for the women and children on the lawn and the sidewalks along east side was crowded with listeners.

Judging from the applause, honking of car horns and the complimentary remarks of the audience, the several selections were thoroughly enjoyed and appreciated.

One feature which added much to the comfort and refreshment of the bandmen was during the intermission when Mr. C. W. Mellor, our popular local Confectioner treated them all to cold drinks. This friendly gesture of good citizenship on Mr. Mellor's part will no doubt be appreciated not only by the band members but by all citizens who are behind the Redcliff Citizens' Band.

It is to be hoped that Redcliff folk will be treated to several more such concerts during the coming weeks.

## "ANOTHER BAND CONCERT" Sunday Night

- Just as we go to press we learn that there will be another Band Concert this Sunday night at 9:00 o'clock. By request the program will consist mostly of March Selections.
- Please keep in mind that half the collection goes to Park Committee and the other half goes to the Band.
- Last Sunday the collection amounted to \$15.40.
- Let's double it.

Mrs. A. N. Collard and her mother, Mrs. Foster, are expected home from Elkwater at the week end.

Mrs. Basil Moore and family left for Elkwater Lake today, where they will enjoy several weeks holidays.

The Misses Kathy Myers and May Gordon were hostesses at the home of the former on Tuesday evening at a delightfully arranged miscellaneous shower in honor of Miss Beatrice Dutton, an August bride elect. Cards were played during the evening, high score and consolation prizes going to Miss Evelyn Fitzhugh and Miss Marjory Fairhurst respectively. Miss Dutton was the recipient of a large number of gifts for which she warmly thanked her friends.

## Home Town Team Makes Good Showing

Two Very Exciting Games Played in Irvine Last Sunday

Last Sunday the Redcliff hall team played a double header at Irvine, winning both games by scores of 7-4 and 14-2.

Judging by the numerous wins of the Irvine Nine this season it would rather indicate that the local boys are putting up a much better game this year, and fans may look forward to seeing some good ball in the near future.

A good crowd turned out to see both the afternoon and evening games in Irvine and proved to be a very appreciative audience to play to as they were loud in their appreciation of good ball on either team when credit was due.

The afternoon game was full of excitement and reverses, as the score of 7-4 indicates.

In the first three innings Redcliff built up a lead of 3-0 but in the fourth and fifth innings the score was completely reversed, giving Irvine the lead to the tune of 6-3. Both teams tightened down then till the eighth when Ed Schmidt stepped up the score up to 6-5 by laying down a home run and clearing Alex. Paterson over the plate to score two runs. Later on in the same inning L. Stone hit a two bagger and R. Allanbach scored, tying the game. Finally in the 9th, Ed Schmidt got another nice hit and was advanced to 3rd, and in scoring position with only one away, when Pat Harrison made a sacrifice bunt down the third base line, scoring Schmidt and being thrown out at First himself. That play finished the game with Redcliff ahead with a score of 7-6. Bill Swanson gave a splendid exhibition of good pitching, striking out 14 of the Irvine batters.

The score of 14-2 in the evening game was no indication of a slow game as every point was a hard fought battle. The Irvine boys were introduced to some really high-class hurling when Clyde Barr stepped into the box. K. B. allowed only 4 hits and of those only two were able to score.

Irvine is giving us a return game this Sunday. So don't forget to be there in full force and give the boys a little backing.

## Engagement Announced

Mr. and Mrs. A. D. Irvine of Medicine Hat, announced the engagement of their youngest daughter Elizabeth (Betty) to Mr. Truman H. Harrison (Pat) son of Mr. and Mrs. Wm. Harrison of Medicine Hat, the marriage to take place the middle of August.

## NOTE OF APOLOGY

The local Bandmen express their regret that their concert last Sunday evening was held during the time of the Church services. This was unavoidable due to the fact that they had to take advantage of the daylight in the future, however, the Band will have its own lighting system and concerts will not begin until 8 o'clock so that churchgoers as well as others may enjoy their Sunday evening entertainments.

## What's The Matter With Redcliff

Are We Poor Sports or Just Indifferent?

Baseball has had its ups and downs in Redcliff for many years.

Almost every year the nucleus of a good team is started but the enthusiasm soon peters out and every year an entirely new start has to be made.

Redcliff is surely big enough and has sufficient baseball material to keep a good club going from year to year.

Then, wherein lies the fault? With the players or with the people of the town?

Perhaps the fault may be attributed to both to some degree. There are two sides to every story.

One thing is certain—no baseball team can long survive if the people of the community do not show considerable interest in it. The people must support the team by attendance at the games and by financial aid. The boys cannot do it all themselves.

On the other hand the team must produce the brand of ball and sportsmanship that the people can be proud of. And this cannot be done without discipline and practice.

This year, Mel. Collard has got a team started again, and deserves the backing of all good sports for his expenditure of time and money. Don't let him down.

The boys have worked hard to get the local diamond in shape and everything is now in readiness for the games with Irvine on Sunday. They gave a good account of themselves last Sunday, and will doubtless do it a gain. And we don't mean by this that they must necessarily win in order to play good ball. A sporting community supports its ball team whether it wins or loses.

So do your part, folks, and the lads will do the rest. And when you see a girl wandering through the crowd with a hat in her hand, don't take fright. She will only be taking the collection to keep the team going. Be as generous as you can and let us keep a ball team a permanent asset in this town.

## GORDON MEMORIAL

Sunday July 30th. 1939.

10.00 A. M. Sunday School.  
7.30 P. M. Evening Service.  
Bright Brief Hyman Service.

## Local Family Lose Home Early In Morning Fire

Parents and Four Children  
Escape From Upper Window

About 4 o'clock Saturday morning the fire which started in the morning and it was not long before a crowd had gathered about Ed. Testers home in the West end.

The house was by this time a roaring inferno, and though the firemen did their best the house and contents became practically a total loss in a short time.

Fortunately no lives were lost. Mr. Testers managed to find the lower floor in flames and the upper rooms full of smoke. He called for help and neighbors immediately responded. Mr. and Mrs. Testers and their four small children had to escape through one of the upstairs windows in their night clothes.

We understand the loss was partly covered by insurance.

## BALL GAME

There will be two Ball Games in town on Sunday between the Irvine Nine and the Local Boys. The first game to start at 2:30 and the second at 6:30. If the games at Irvine last Sunday are any indication of the type of ball you will see this Sunday you can be sure of seeing some real good ball played.

## An Once Of Prevention

The accident which befell a local boy this week in which he may be in danger of losing an eye, goes to prove once more that slingshots are not play things but are really dangerous weapons and should not be in the hands of children.

Slingshots are in the same class as R. B. guns, too dangerous to be played with.

Parents would be well advised to confiscate all such articles and impress it upon their small sons that it is better to be sure than sorry.

Mr. and Mrs. Sid. Worts were visitors in town on Sunday. Mrs. G.H. Worts returned with them to Finedale, where she will recuperate after her recent illness.

## Swimming Pool Com. Appeals to Parents

Many Now Enjoying The Pool  
Have No Season Ticket

It has been brought to our attention by the Swimming Pool Committee that many people both young and old are enjoying privileges of our local Pool but have omitted to obtain a season ticket.

Some of the offenders, we understand, are quite able to purchase one of these tickets at the very low cost at which they are offered.

When we think of how much time and money have been expended in this enterprise, it does not seem too much to expect that those who are benefiting thereby should pay their rightful dues in order to help defray the expenses of such a worthy community undertaking.

If YOU have become delinquent in this respect, trying to forgetfulness or procrastination or through no fault of your own, the committee would very much appreciate it if you would attend to this matter at once. And if you are just a common slinger of this sort is a very poor place in which to play your trade.

## Council Meeting Was Very Brief Monday Night

Short Meeting and Very Little  
Business Done

The regular meeting of the Council was held in the Town Hall on Monday evening, with Mayor Sangster and all council members present.

The School District demand for \$750.00 was ordered paid. The regular accounts as passed by the Finance Committee were ordered paid.

A Bylaw setting out the rates of taxes for the current year, was passed. There will be no change in the tax rates.

The meeting then adjourned.

## NOTICE

Any Redcliff residents desiring grasshopper poison for their gardens may obtain same by applying at the Town Hall and bringing their own bags.

Miss Carol Sellhorn received word yesterday from the Department of Education that she had been successful in passing all Grade XII subjects written or in the June Examinations. Congratulations, Carol!

## Serious Accident Befalls A Young Local Town Boy

Slingshot. Prove To Be A Very  
Dangerous Plaything

A very serious accident happened in town on Monday. Young Joe Baier while playing with some friends was struck in the eye by a stone from a slingshot in the hands of one of his companions.

Medical attention was immediately called in, and Joe was taken to Medicine Hat on Tuesday for further examination.

While the eye is very seriously injured hopes are entertained for saving the sight.

## Water Pipes Too Small

It has been brought to our attention recently that the water pipes leading from the mains to the private property in the West End of town are much too small in diameter to give an adequate supply of water for gardens or lawns. One enterprising citizen hauled 36 tanks of water last week for his suffering vegetable and fruit, in order to make up for the insufficient amount he could obtain through the pipes during the watering hours.

This doesn't look like the way to encourage householders to be thrifty.

How about it Mr. Councillor? Can anything be done about it? If not—O. K. If so—why not?

Miss Helma Rexia is visiting with friends at Tilley this week.

Mr. and Mrs. Thos. Floyd and David, who have been holidaying at Calgary and other northern points for the past two weeks returned home on Thursday.

Miss Doris Wyatt left on Friday night for Toronto to resume her nursing duties after a two-weeks vacation here and at other western points.

The Misses Jessie Stratton and Sylvia Kaldestad who have been holidaying at the Stratton Cottage at Elkwater, returned to town on Tuesday.

Mrs. Ron. Simpson and small son Douglas of Calgary, who were Redcliff residents three years ago, are in town at present, visiting with Mr. and Mrs. Don. Burk and family.

Mr. and Mrs. J. Kitchner are leaving at the first of the week on a fortnight's vacation at Spokane where they will be the guests of Mr. and Mrs. G. H. Pickering.

## Public Opinion In Action

To those who have their ear to the ground, there appear to be signs that the public viewpoint on the question of substantial expenditures by the various governmental units in the country is veering in the direction of espousal of what are sometimes anaveringly referred to as "the good old virtues of thrift and economy."

If this is so and if there is a very definite and pronounced trend of public opinion in this direction, the time may not be far distant when governments will start tightening the public purse strings and when government officials, at the behest of their superiors, will commence to sit heavily on the life of treasures.

This trend towards a changing viewpoint on the subject of public expenditures is not only apparent in many parts of the Dominion of Canada, but there are signs of it in the United States.

The phenomenon is not an unmitigated one on this continent. It has been a matter of observation over a long period of years that public opinion is a very variable factor, and is inclined at times to run to extremes. The pendulum of thought on the subject of public expenditures is apt to swing in a wide arc, marking now a definite trend far to the right and now well to the left on points of general public concern.

For some time now there has been a general disposition on the part of the majority of the people not only to condone, but to urge generous expenditure of public money, sometimes it is to be feared, without much thought of the cost of reckoning which is bound to follow sooner or later.

### Feeling The Burden

Now, if signs are read aright, there is a hint of a trend in the other direction. The cause of it may be difficult to diagnose but perhaps more and more people are beginning to feel the burden of taxation and to realize that there can be no surcease as long as liabilities continue to accumulate and budgets remain unbalanced.

Some very sound thoughts on the subject of the relationship between public opinion and governmental reaction are contained in the final of a series of articles by Allan Meikle, president of the Canadian Federation of Labour, in a recent issue of the *Labour Review*, the Federation's official organ, in which he points out that in the final analysis the solution of the railway problem depends upon the relationship of public opinion to railway leaders.

"I want to say great stress on this," writes Mr. Meikle, "because, if these days of governmental interference in economic affairs, of government attempts to control the hours that men work and the wages they receive, there is a very grave danger that in the final analysis a government will attempt that all that is necessary to secure a great victory is to persuade the government to do this or that for their advantage."

"There could not be a greater mistake," A moment's consideration should show this, for it must be obvious that the only reason that led the government of a democratic country to undertake any protection for the wage earners is the belief that public opinion will support this course. Therefore, the lasting quality of any action in aid of labour which a government may take must depend on the skill of the government in judging not only what is the attitude of public opinion at the moment, but what it is to be in the next change.

Let it should be charged with a cynical attitude, and told that democracy can surely produce something better than a political system in which the government depends always on public opinion, and that public opinion is the winner; let it be told that governments should do what is right and take the consequences—let me point out that this is all mere talk. Governments and the democracies must be guided by public opinion. If a government decides to do something because it is right, but actually succeeds in doing something which is unpopular, the fact that the government has done this is of no importance, for the succeeding government will simply undo it. It is the first and simplest duty of a democratic nation to consider what the voters want and to give it to them.

### Too Far Sometimes

"Of course, in our times the responsive attitude of government to public opinion has been carried a little too far, and we all know that governments, in this and all other democracies, are nowadays inclined to do more than give the public what the public wants. They are actually going on trying to make the public want things, so that the government may get the credit of having done what the public wants."

It is an old story that governments are actually trying to bribe the public by great expenditures of public money—only because the public sometimes forgets that public money is the public's money, and that everyone who benefits from any sort of government expenditures is also paying a share of them.

"Indeed, experience seems to show now that the weakest elements in our economic system—the workers and the farmers—who are the elements to whom the government generally appeals with large public expenditures are exactly the elements who pay a disproportionately large share of the cost of running the country, and only fail to know that they do this because our indirect taxation tends them to believe that the rich pay more than their share of taxes."

### A Roof-top Lookout

A striking feature of houses of old Nantucket Island is the "Widow's Walk" which surrounds the chimneys, and often the whole roof, of these old houses. Here the wives of the sailors and captains of the whaling ships, which put out to sea for weeks at a time, used to stand on the high above the breakers, to watch for the sails of their husbands' ships returning.

Bernard Pittsford, of the 6th North Gloucestershire, is the only private in the British army. He is five feet 11 inches tall, half an inch over low regulations.

### "Started Canning Industry"

You'll never guess who started the canning industry in New Zealand. It was Napoleon. When the Little Corporal landed out to set a mark for present-day dictators to shoot at, he offered a reward of 12,000 francs to the man who would find a way of preserving food for his army. Forgotten Frenchman, Nicolas Appert, won.

### Popular Summer Resort

More than a fortress, Gibraltar is widely favoured holiday resort visitation annually by thousands with golf, hotel, bathing beaches, golf, Spanish cafe, and regular service to "the Rock" and across the narrow straits to North Africa.

The term naval stores was applied to turpentine, rosin, and pine oil back in the days of the seagoing Phoenicians.

London has an all-time low in vagrancy, according to a new census of homeless people.

To preach health to people living below the poverty line is the greatest of all.

### What X-Ray Revealed

War Veteran Carried Bullet Behind Heart For 22 Years

The London correspondent of the Ottawa Journal, tells this story: Some strange things happened during the Great War, and now and then one hears of equally strange sequels to that expensive and as it proves usually, adventure. A London club cricketer, who served in the infantry during the war, and was with Altona in Palestine, has recently been alarmed about his otherwise fairly robust health. He began sitting up blood.

After a heart specialist and a lung specialist had examined him, and pronounced his heart sound and lungs intact, a further research by X-rays was deemed advisable. It was then discovered, greatly to the cricketer's amazement, that there was a bullet embedded behind his heart. It was extracted and proved to be a Turkish one.

Now the astonishing fact about this case is that the ex-soldier concerned never knew that bullet hit him. He was in hospital for some time with a superficial shrapnel wound, but never dreamed that he had also been hit by a Turkish bullet, and was carrying it round inside him for 22 years.

### Life On Mars

Astronomers Learning More About Interesting Planet

Astronomers watching the 15-mile-a-second approach of the planet Mars believe its inhabitants, if any, must be carbon dioxide breathers.

If raiders from Mars rode space ships to the earth they would have an immediate supply of dry ice. The ice would keep them near their comfortable temperature for some time, and Mars would give them their kind of food.

Astronomers place Mars' normal temperature at 40 degrees, ranging downward to 100 below zero at night, Dr. Walter S. Adams, director of the Carnegie Institution's Mount Wilson Observatory, reported.

Astronomers estimate that Mars, in July came within 36,000,000 miles of the earth, its nearest approach in 19 years.

The so-called canals on the planet are in for close scrutiny. Strong evidence that the lines observed on Mars are canals would support a suggestion they were built to carry water from the Polar ice caps to the arid areas. Apparent dust storms will also be studied.

### New Shipbuilding Record

Already 42 Vessels Have Been Ordered by Clyde This Year

A new world shipbuilding record will be claimed by the Clyde this year, when the shipyard will build for an individual one hundred.

Within the next few months, John Brown and Co., Clydebank, will prepare for completion the largest aggregate of tonnage in the history of an individual yard.

Another 42 ships, aggregating 141,000 tons, have been launched on the Clyde this year.

Another 42 ships, aggregating 141,000 tons, have been launched on the Clyde this year. Another 42 ships, aggregating 141,000 tons, have been launched on the Clyde this year.

### Canada's Export Trade

Heavy Increase Shown For The First Six Months Of The Year

Canada's export trade for the first six months of the current calendar year was valued at \$462,000,000, an increase of \$73,000,000 over the same period of 1938, according to figures issued by Hon. W. D. Roper, trade minister. This represented an increase of nearly 16 per cent. over the low in the depression year of 1933.

"This increase in Canada's export trade is reflected in Canadian industrial activities," said Mr. Roper, "most of which show substantial increases in the first half of 1939, compared with the corresponding part of the preceding year, according to the Dominion Bureau of Statistics."

All parts of Canada shared in the boom. Mr. Roper said, although the low world price for wheat flour and wood pulp obscured to some extent the full significance of the upswing.

### Built Of Mohammadeans

Orthodox Mohammadeans are loath to construct a building or weave a rug that has straight lines or square symmetry. They believe that only Allah is perfect, and that to construct a perfect building or rug is sacrilegious.

### Morale Is Maintained

Following Unsettling Hours In Difficult Times Is Important

British officials and gentry booked in Tientsin for dinner during the Great War, and now and then one hears of equally strange sequels to that expensive and as it proves usually, adventure. A London club cricketer, who served in the infantry during the war, and was with Altona in Palestine, has recently been alarmed about his otherwise fairly robust health. He began sitting up blood.

After a heart specialist and a lung specialist had examined him, and pronounced his heart sound and lungs intact, a further research by X-rays was deemed advisable. It was then discovered, greatly to the cricketer's amazement, that there was a bullet embedded behind his heart. It was extracted and proved to be a Turkish one.

### In Pioneer Days

Women In Nova Scotia Told About Conditions Years Ago

Mrs. Mary Elizabeth Doring, of Amherst, N.S., can look back 98 years to the pioneer days of the Annapolis county village—and the time her husband charged only 20 cents for two days' board and lodging at his new hotel.

On her 97th birthday alas told friends of the times when settlers used to borrow live coals from each other to light their fires, sometimes walking miles for them and nursing them carefully all the way home.

Her father and uncle cut the logs that went to construct the first cabin in the district. Paths were cut through what was then dense forest to enable them to ride on horseback. Cooking was done over a stone fireplace.

The settlers grew flax and raised sheep, spinning and weaving the wool into clothing. Lint was bought and there were no huxories, she said, but all were happy. Shortly after their marriage, her husband, now dead, opened a hotel at Albany Cross which he ran for 62 years; the recollections he charged the first guest only 25 cents for a two-day stay.

It is 90 years since she married.

### Spoil Tourist Attraction

Dogs Drawing Carls On Quebec Road Now Forbidden

Present-day demands for greater safety on the highways have caught up at last with Quebec province's picturesque and dog carts.

Roads Minister Anatole Carignan announced Quebec's habitants no longer would be allowed to use their dogs to draw carts. The ban was placed, the minister said, "with a view to promoting safer traffic conditions."

In some sections of the province dogs have been used since the days of New France to deliver milk and other produce in rural districts. Recently, however, they have become more and more an attraction for tourists.

Dogs, wearing spectacles, fedoras and sometimes with pipes in their mouths are attached to small two-wheeled carts.

The dog carts are a familiar sight to visitors to the province, especially to those who travel the "Beauport route" from Quebec to the famous shrine at Ste. Anne de Beaupre.

### The King's Detective

Albert Canning Dislikes Publicity And Chose Is His Hobby

According to London Tit-Bits, grey-haired Albert Canning, special branch police chief responsible for guarding the King and Queen in Canada, is the son of an Essex business man, was educated at a local grammar school, started his career as a Bobby at Whitechapel.

He held an important post in the Intelligence Service at G.H.Q. during the 1914-18 war, became leading expert in German codes cyphers. He guarded King George V's birth in France, was the first man to enter Lille after the German occupation.

He hates publicity, refuses to talk about himself, devotes much of his leisure to playing chess.

## Overland Route Favored

Edmonton Will Be Aerial Gateway To Orient Says Captain Bell

Edmonton is destined to be the aerial gateway to the Orient in the opinion of Capt. James Bell of Edmonton, an authority on aviation in western Canada. He said other aviation authorities share his view.

Capt. Bell said few realize that it is 4,000 miles shorter from "United States Imperialist" centres such as Chicago, to Shanghai, trading centre of the Orient, via Edmonton than via the present over-ocean route from San Francisco.

"As soon as peace comes to the Orient you will see an immediate beginning made on this route," he said. "Then Edmonton will come into her own. That is the future we are preparing for in developing our airport facilities here."

Capt. Bell is manager of the Edmonton Hatfield airport, home port for Canada's northern airmen.

Edmonton is the focal point of the main air trail from the United States with Europe via the trans-pacific route and the Orient and the East via Yukon and Alaska and Bering Sea, said Capt. Bell in an interview.

"As I see it, Edmonton will be the meeting point of three main routes. From Edmonton planes will fly southward over the trans-Canada Airways route to connect with airlines in the United States to all points on the North and South American continents."

"From Edmonton, too, planes will fly northwest to Whitehorse in the Yukon, on to Fairbanks, Alaska, westward to Nome, across the Bering Sea to Asia, down the coast to Japan and China, Australia, Singapore and India."

He said the third route would be northward from Edmonton across the North Pole to Moscow and on from there to the capitals of Europe.

"While I expect that this last route will be the last to be developed, the other two will become realities in the near future."

Long over-water hops, Capt. Bell explained, increase the cost of plane operation and risk. Aviation authorities favor the overland routes.

It is significant that wherever possible Imperial Airways, England's Empire link, chooses overland in preference to over-water routes."

## Making Jobs

Mining Industry Is Doing Its Bit In Solving The Youth Problem

Mining is a young man's game. Youth directors put on a party for all their miners and their families. There were about 200 men and two more women and children. Someone started a sing-song. It was suggested that all the war veterans stand up and sing "Tipperary." Out of the head table, only three men stood up. The others were all too young to have been in the war.

Over at the Pickle River 50 miles away the mine manager and the accountant are the only two men on staff who are over 34 years of age.

Opening up of new mines is doing more than any other one thing to solve the "youth problem" in Canada. The Financial Post has long contended that the youth problem is a mental part of the general unemployment problem. As jobs are provided the youth problem will disappear.

The mining industry is doing its part to provide these new jobs—Financial Post (Toronto).

## Diukies Growing Old

Musical Note Publishers His Age But Is Now 80

Premier Benito Mussolini observed his 80th birthday on June 29, but as in recent years the Italian press had instructions to make no mention of it. It thus was diukies growing old and never publishes his 80.

Mussolini is said by his doctors and intimates to be in splendid physical condition. He leads an active life, piloting his own plane, driving a racing car and motorcycle at break-neck speed, yodeling, and every morning and evening. His motto is "Live dangerously."

## Eagle Made Good Retriever

But Dropping Duck At Hunter's Feet Was An Accident

Maybe this is a "rab" story about a duck hunting trip, but Frank Duck, C. Courtney, B.C., reported that while hunting, he had been unsuccessful until he fired at a mallard duck and the bird plunged into the water of the lake.

Duck said that an eagle saw the bird, swooped down, clutched it in its talons.

As the eagle soared over Duck's head, the mallard slipped from the eagle's talons and landed almost at the hunter's feet.

## Case Of The Seed Grain Plot

Precautionary Measures Are Necessary To Ensure Success

The seed plot has assumed greater importance during the past few years with the introduction of the new rust resistant cereal varieties. Usually the amount of seed available to any one grower of these new varieties is limited or in cases where larger amounts of seed are available, price may restrict the quantity that can be purchased. The responsibility, therefore, of increasing this seed without sacrifice of purity, lies in the hands of the grower. The success which may accompany his efforts will depend largely upon the care accorded the crop from the time the choice of land is made until the crop is safely in the granary, states W. H. Johnston, Dominion Experimental Farm, Brandon, Manitoba.

Generally speaking, choice of land presents no particular problem since most farmers will favour new seed with their best summerland. An error frequently made when seeding is to leave insufficient space between the seed plot and adjoining fields of grain to prevent contamination of the former. In such cases a path of at least 25 feet in width should be cut out some time before the grain is ripe. The most satisfactory plan, in fact, arrangement permits, is to isolate the plot entirely from other fields of grain.

Roguing for impurities may best be carried out when the heads have filled somewhat, although in some instances early maturing off-types are more readily noticeable at the time the crop is heading. Heads of the average type are studied and any that appear to be off-type are rogued out with other crop plants and weeds. Many weeds can be removed more cheaply and completely at this time than after the grain has been threshed and in most cases it is impossible to separate mixed varieties at this time.

It is important that the seed be rogued in roguing is most facilitated if the crop has been sown in rows. This allows the grower to walk in and a greatly reduced number of plants per unit area to examine, roguing up to 100 plants per acre.

Seedling in rows rather than in a solid block is of advantage in the case of high priced seed. The seed-to-yield ratio is much increased due to the more favorable environment afforded the plants. On the seedling farm at Brandon all elite stock is grown in three-row groups with a cultivated pathway 30 inches wide between each set of rows.

It is during the rush of harvesting that the pollution of the seed plot usually occurs. The grower is often impatient with the delay necessarily accompanying the handling of the seed in small acreage separately and fails to follow precautionary measures. When the seed is threshed and falls to follow precautionary measures. When the seed is threshed and falls to follow precautionary measures. When the seed is threshed and falls to follow precautionary measures.

## Advice From Lifeguard

Every Swimmer Should Learn The Rudiments Of Life-Saving

An experienced lifeguard writing in the Baltimore Sun says: "Don't try to rescue another person by plunging in yourself unless you have had life-saving training. At our beach, 40 bathers, unskilled in life-saving, attempted to aid drowning persons, were grabbed in strange holds, and had to be rescued themselves." It thus seems that the fact that every man who learns to swim should also learn the rudiments of life-saving. For what swimmer would see another drowning and fail to attempt a rescue?

## Made Fortune From Inventions

Man Who Drove Zipper Fastener To World Is Richer

The inventor of the zipper is retiring at the age of 50 years. He is Gideon Sundback, Medville, Pa., who between 1913 and 1929 registered 79 domestic patents that made him wealthy. Sundback and the late Col. Lewis Walker organized Talon, Inc., which now produces about three-fourths of American slide fasteners. The inventor, came to America from his native Sweden at the age of 23.

The globe-trotting of all kinds in the Arctic term which each year makes a round trip from the Arctic to the Antarctic, a distance of some 10,000 miles, averages 100 miles a day.

## ONE OF THE QUEEN'S PROUDTEST MOMENTS

When Queen Elizabeth recently visited the Swimming Club in London where Princess Elizabeth and Princess Margaret Rose have their lessons, she was in the happy position of watching the two Princesses win trophies. In the picture above Queen Elizabeth is presenting a challenge trophy to Princess Margaret Rose, while Princess Elizabeth (back to camera) waits her turn.

## Smallpox Vaccine

Pasteur Institute Introduces New Method To Eliminate Scars

Two years of research at the Pasteur Institute have produced a smallpox vaccine which leaves an almost imperceptible scar when injected in humans and causes virtually no fever or unpleasant after-effects.

Dr. Harry Plotz, American laboratory chief of the institute, described the vaccine as "practically perfect" to the Academy of Medicine. He said that more than 50,000 soldiers already had been vaccinated with it and that it would be used throughout France beginning next October.

Plotz said the new vaccine is free of secondary bacteria, which caused scars and after effects in earlier vaccines. Attempts at eliminating these secondary bacteria in the past, he said, resulted in destroying the efficacy of the cowpox vaccine.

The new vaccine is obtained, he said, by injecting cowpox bacteria into rabbits and transmitting the resultant virus to several generations of rabbits until all secondary bacteria are bred off. Once a sterile virus is obtained, he said, it can be transported to the laboratory and grown in large quantities at low cost.

## Mecca For Visitors

Hundreds See Beaver At Restoration Colony In Laurentians

A few miles northeast of Montreal, in the foothills of the Laurentians, the village of Terrence is headquarters for the Canadian Beaver Restoration colony. The colony is a mecca for hundreds of visitors—and for natives too—particularly families that include children or nature lovers.

Here the beavers, old and young, the latter known as kits, put on a show and water show that perhaps is unequalled in wildlife exhibits. Their antics may be recorded by camera fans who enjoy the thrill of a close-up view of animals.

One inch of rain means more than 100 tons of water to an acre.

## Passengers On Nascopie

Including Crew 78 Persons Are Making Trip To Arctic

The supply ship Nascopie, carrying its customary cargo of every thing from baby carriages to movie magazines, has left Montreal on its 27th annual trip to Hudson Bay and the Arctic region.

Before the Hudson's Bay Co. ship sailed for the north on Sept. 26 she will have visited 21 northern ports and travelled nearly 11,000 miles. On the ship will be the crew of 41, 13 passengers, a company party of 11, and a government party of 14 in charge of Major D. L. McColl.

The passenger group are scientists, members of the Royal Canadian Mounted Police, a doctor and other government officials.

## Russian Oilfield

High Grade Petroleum Reported In The Ukraine

In the Ukraine a new Soviet oilfield—the first to be developed there—is attracting thousands of workers to the Romy and Poltava region.

Well No. 12, which began flowing at a depth of 1,000 feet, is producing high-grade petroleum. Intensive prospecting over a wide area is expected to open up other fields. Large scale production is expected by January.

The discovery has military importance in that it would make possible a supply of fuel for a motorized army on the Ukrainian border without the long haul necessary from the Caucasus fields.

## Connected By Street Cars

The famous coast resort of Belgium are all connected by a street car system, and it is possible to start beyond one frontier in Holland, and ride through Belgium beyond the western frontier into France.

A plastic manufacturer foresees that an automobile body may be made all-plastic and turned out complete within eight minutes.

## Design Is Unusual

New Motor Ship From Clyde Shipyards Is Floating Garage

The output of new tonnage from Clyde Shipyards recently included a merchant vessel of unusual design, which has been described as a floating garage. This motorship, which is 306 feet in length, has been built by Messrs. William Denny and Bros. to the order of the London, Midland and Scottish Railway Co. and the Stranrair and Larne service.

While the top deck of the ship has accommodation for 1,000 passengers in two classes, the main deck is specially designed for the transport of motor cars. This deck is open without bulkheads practically from end to end, and special facilities are provided for the rapid loading and unloading of vehicles. The cars will run on to the deck under their own power by a ramp connecting the after end of the ship with the shore, and turntables are provided for use in manoeuvring the cars where required.

The vessel will be the first motorship in the L.M.S. service to Ireland.

## British Food For Navy

No Goods Imported Unless It Is Absolutely Necessary

The British war purchase of foodstuffs to the fullest extent possible, buying imported goods only when domestic or Imperial-produced goods are not obtainable at acceptable prices, Geoffrey Hopes, financial secretary to the Admiralty, told the House of Commons.

He is a millionaire to-day, but in the first eleven years he tried his hand at writing. George Bernard Shaw's total income from belated letters was \$45— a few pennies better than a year.

## Meeting With Success

Physicians Helping People Who Suffer From Stammer To Regain Normal Speech

It wasn't so long ago that persons afflicted with speech disorders used to stammer and stammer their way through life as best they could. Unfortunately such victims were unwittingly evoked, public amusement, yet received little attention from the medical profession.

To-day physicians and psychologists are delving ever deeper into the subject and have developed sound methods to regain normal, or at very least near normal, speech.

Child sufferers are receiving much attention. In certain New York clinic boys and girls romp and play together in a kindergarten, the only one of its kind in the world devoted to speech correction. The youngsters, for example, are encouraged to speak into toy telephones and overcome their natural timidity.

When they enter the kindergarten, they are met by a number of patients' faces and kept for reference and to compare when the correction course is completed. The children are allowed to listen to themselves speak, and as the records play their most frequent remark is "Do I sound like that?"

About 80 per cent of the pupils receive free treatment, and more than half stammer. For them treatment begins with instruction to do everything slowly and easily. This regimen, clinicians have found, tends to counteract the stammerer's nervous tension and high emotionality.

One little girl now in the kindergarten suffers from glossolalia, which means she has a language all of her own. She is the daughter of two brothers whose language was completely mystifying to their parents and everyone else. She is perfectly intelligible to each other.

While stuttering and stammering are most common complaints, the clinic handles patients suffering from cleft palate, oral lacerations, aphasia and other more obscure disorders.

So widespread is the war that the National Hospital for Speech Disorders that persons have come to it from all over the world. The desperate young man rode a freight train across the continent in sub-zero weather to look at the free clinic door. A New Zealander shipped on a steamer for British Columbia and was hitch-hiked from Vancouver to New York.

The hospital, only one of its kind in the world, was founded in 1916, as the gift of a rich philanthropist.

## All In Knowing How

Hole-in-One Given Lesson In How To Handle Customers

A number of years ago a hole-in-one at the glove corner in the Wana-maker store, having finished waiting on a woman customer, turned to wait on a man. As she was fitting his gloves he remarked: "If you will allow me to say so, you didn't take much trouble to satisfy your last customer."

The girl looked peeved and said, "Oh, you need to know a lot about waiting on customers? Why don't you try it and show us how?"

"I've had a bad time of it in the mail waiting behind the counter. 'May I step on you, Madam?' he continued, addressing another customer. "I want a pair of washable long white gloves."

As she selected a pair, the man said, "But you will want an extra pair while these are being washed; will you not?"

"Oh, I suppose I shall," replied the woman.

"Naturally," assured the man. "And these," he continued, "are exactly the same kind of gloves, only in gray, as you see, for afternoon wear. I have two pairs of these."

The woman took them. He held her four pairs of gloves when she came to buy one pair. And all in 10 minutes.

"Say, you're mummer!" said the misgiver. "You ought to get a job here."

"Well," replied the man gently, "you see I've other things to do. And he gave her the card which read, "Mr. Rodman Wana-maker."

## A Gallant Root

For real chivalry, says the Brunswick Recorder and Times, Nova Scotia's Angus Macdonald, has it all over other Canadian premiers. Others merely shook the hand of Queen Elizabeth at a party, but Angus stooped and kissed it, and the Queen, we are told, was delighted.

## A Versatile Tree

The Australian eucalyptus tree is believed to be one of the most useful plants in the world. It is being used successfully for making excellent cream writing paper, for the production of eucalypti, for medicinal purposes and a very palatable liquid known as Eucalypti.

The huge floating dock which has been a familiar landmark in Portsmouth Harbour for several years is seen being towed out of Portsmouth Naval Dockyard on route for its unknown destination. Eighty men volunteered to travel on the floating dock for the voyage which will be long and slow for the maximum speed will be about four knots.

## WORLD HAPPENINGS BRIEFLY TOLD

The united senate foreign relations committee at Washington voted to postpone until the next session of congress consideration of neutrality legislation.

The five-year-old 7,000-ton cruiser Amphion was renamed H.M.S. Perth by the Duchess of Kent in a ceremony marking its transfer to the Royal Australian navy.

A Canadian ward board office has been opened in Toronto and placed in charge of Lorne H. Johnson of Toronto. The office will take care of the board's business in the eastern area.

Ernst Schuchbach, former farmer of Bay Tree, Alta., and his wife, will be tried in Switzerland, Sept. 12, for the alleged poisoning of the woman's first husband, Paul-Henri Nicolet, prosecuting authorities said.

Contract has been placed by the national defence department with the Fleet Aircraft Co., of Fort Erie, Ont., for 27 training planes. The value of the contract is said to be in the neighborhood of \$250,000.

Donald G. McKinnis, vice-president of United Fruit Co., has been appointed by the board of governors of the University of Manitoba to complete the term of A. A. Tisdale, who recently resigned. The term expires in 1942.

Sir Percy Wilm Everett, deputy chief commissioner of the Royal Air Force, Great Britain, will make an official tour of Canada this summer "to secure a better appreciation among leading professionals and business men of the value of the work of aircraft."

### Changing A Name

A Brief Reference To History To Before A Misapprehension

Percy James Osterhout, of White Plains, N.Y., has gone to court and had his first name changed to Henry. He doesn't understand why it. But there appears to be a stigma attached to the name of Percy in the minds of many people in this country, and since childhood your petitioner has been subject to considerable ridicule and jest for the reason that he bore that name, which has been a hindrance to his business as well as in his social relations."

From time immemorial men have borne the name of Percy or its equivalents, and most of them seem to have been pretty tough babies. There was Perceus, of the Greek legend, who chopped off the dragon's head and got a whole constellation named in his honor. There was Percival, or Parsifal, hero of the quest for the Holy Grail. William de Perel helped William the Conqueror to take England and founded a family named in English history. Henry de Percubus subdued Scotland for years. Many later Percy's fought in battle, including Sir Henry Percy, who became a soldier at the age of 14 and showed much skill in border warfare that his enemies called him Hotspur. That may suggest an explanation for the reluctance of those old-time Percys. Perhaps the idea of going to court and getting new names not having been suggested, they just had to fight to keep people from subjecting them to "ridicule and jest."—New York World-Telegram.

### Report By Carrier Pigeons

When Birds Were Fed Too Well It Impaired Their Usefulness

"When a traveling tourist C-8 sighted the vast of the Gormen High Sea Fleet on Aug. 10, 1916, he said to report by carrier-pigeon. Unfortunately the seaman in charge of the pigeons had made pots of them and fed them too well. One and all refused to abandon their happy home in the fore-park of the traveler. On another occasion a "C" class submarine tried to report by carrier-pigeon, to find that they had been so over-fed by their keeper that they could not fly. They fell into the sea, and were rescued with considerable trouble and risk.

Carrier-pigeons, however, often did wonderful work. When the "over-sea" submarine was returning from patrol they used to release pigeons as they neared the coast to announce their approach. A speed of 30 miles an hour was allowed of the pigeon, and the birds were, if possible, released in the early morning, so that they could reach their destination by daylight.

Hares have long ears and long legs. They are born with a well-developed coat of fur, and with their eyes open.

In Italy, people leave their calling cards when they visit the tomb.

### Expenses Are Light

Permit Hermit Lives Carefree Life And Is Perfectly Happy

He pays no taxes or rent, his expenses are seldom more than a dollar a week, and he is the happiest, healthiest man in Saskatchewan. His name is Ed Beard, the hermit of Pipestone Creek.

Six miles south of the town of Moosemin, in the beautiful Pipestone Valley, Ed lives the carefree life of a bushman and trapper. After 15 years of life under canvas as lumberjack and trapper, he regards the one-room shack in which he makes his abode as a comparative luxury. These days, while the average citizen pines in a lot of time worrying over the latest European crisis, Ed's greatest concern is how the fish are biting along the creek.

During the summer Ed has many visitors from near-by Moosemin, but in the winter he may not see another human being for weeks at a time. "Trapping, cooking, and wood-cutting keeps me busy all day," he explains. "After supper bed always looks pretty good."

The woods along the Pipestone provide him with a wide variety of fruit for the winter, and he has no difficulty securing all the rabbits, ducks, and other game required to give a widely varied menu. The sum of \$50 yearly provides all the beans, rice, flour and tobacco for a year's supply, as well as all the clothing a hermit needs.

Ed believes that a simple diet is the secret of health. He has been sick only once in the last 15 years, and the sickness was the result of a few "bug" showers upon him by a menacing citizen during one of his rare trips to town during the winter.

### HOME SERVICE

WHAT FUN TO SHINE IN POPULAR DANCES!

Patrons 470 is available in mass sizes 12, 14, 16, 18 and 20. Size 16, takes 3 1/2 yards 38 inch fabric; 16, 18, 20, 22, 24, 26, 28, 30, 32, 34, 36, 38, 40, 42, 44, 46, 48, 50, 52, 54, 56, 58, 60, 62, 64, 66, 68, 70, 72, 74, 76, 78, 80, 82, 84, 86, 88, 90, 92, 94, 96, 98, 100, 102, 104, 106, 108, 110, 112, 114, 116, 118, 120, 122, 124, 126, 128, 130, 132, 134, 136, 138, 140, 142, 144, 146, 148, 150, 152, 154, 156, 158, 160, 162, 164, 166, 168, 170, 172, 174, 176, 178, 180, 182, 184, 186, 188, 190, 192, 194, 196, 198, 200, 202, 204, 206, 208, 210, 212, 214, 216, 218, 220, 222, 224, 226, 228, 230, 232, 234, 236, 238, 240, 242, 244, 246, 248, 250, 252, 254, 256, 258, 260, 262, 264, 266, 268, 270, 272, 274, 276, 278, 280, 282, 284, 286, 288, 290, 292, 294, 296, 298, 300, 302, 304, 306, 308, 310, 312, 314, 316, 318, 320, 322, 324, 326, 328, 330, 332, 334, 336, 338, 340, 342, 344, 346, 348, 350, 352, 354, 356, 358, 360, 362, 364, 366, 368, 370, 372, 374, 376, 378, 380, 382, 384, 386, 388, 390, 392, 394, 396, 398, 400, 402, 404, 406, 408, 410, 412, 414, 416, 418, 420, 422, 424, 426, 428, 430, 432, 434, 436, 438, 440, 442, 444, 446, 448, 450, 452, 454, 456, 458, 460, 462, 464, 466, 468, 470, 472, 474, 476, 478, 480, 482, 484, 486, 488, 490, 492, 494, 496, 498, 500, 502, 504, 506, 508, 510, 512, 514, 516, 518, 520, 522, 524, 526, 528, 530, 532, 534, 536, 538, 540, 542, 544, 546, 548, 550, 552, 554, 556, 558, 560, 562, 564, 566, 568, 570, 572, 574, 576, 578, 580, 582, 584, 586, 588, 590, 592, 594, 596, 598, 600, 602, 604, 606, 608, 610, 612, 614, 616, 618, 620, 622, 624, 626, 628, 630, 632, 634, 636, 638, 640, 642, 644, 646, 648, 650, 652, 654, 656, 658, 660, 662, 664, 666, 668, 670, 672, 674, 676, 678, 680, 682, 684, 686, 688, 690, 692, 694, 696, 698, 700, 702, 704, 706, 708, 710, 712, 714, 716, 718, 720, 722, 724, 726, 728, 730, 732, 734, 736, 738, 740, 742, 744, 746, 748, 750, 752, 754, 756, 758, 760, 762, 764, 766, 768, 770, 772, 774, 776, 778, 780, 782, 784, 786, 788, 790, 792, 794, 796, 798, 800, 802, 804, 806, 808, 810, 812, 814, 816, 818, 820, 822, 824, 826, 828, 830, 832, 834, 836, 838, 840, 842, 844, 846, 848, 850, 852, 854, 856, 858, 860, 862, 864, 866, 868, 870, 872, 874, 876, 878, 880, 882, 884, 886, 888, 890, 892, 894, 896, 898, 900, 902, 904, 906, 908, 910, 912, 914, 916, 918, 920, 922, 924, 926, 928, 930, 932, 934, 936, 938, 940, 942, 944, 946, 948, 950, 952, 954, 956, 958, 960, 962, 964, 966, 968, 970, 972, 974, 976, 978, 980, 982, 984, 986, 988, 990, 992, 994, 996, 998, 1000, 1002, 1004, 1006, 1008, 1010, 1012, 1014, 1016, 1018, 1020, 1022, 1024, 1026, 1028, 1030, 1032, 1034, 1036, 1038, 1040, 1042, ## Moving Forward

In the year 1816, an old gentleman  
retired from the British Patent  
Office in London, giving at his  
reason his belief that "Everything  
had been invented."

Today, we can smile at this story.  
Today, we know that nothing in the  
world remains static. In business as  
in life, progress is a necessity. Any  
business that does not move forward  
in its methods and studies, goes  
backward.

A large retail organization cannot  
rely on its name and past history if  
it is to survive. How long would we  
remain in business if we went into  
the markets of the world and just  
picked out the merchandise that  
someone else offered, the styles that  
someone else suggested, instead of  
searching and looking and rejecting  
and selecting until we knew we had  
exactly what our customers wanted?  
How many of our advertisements  
would be read, if we recklessly  
puffed the quality of our wares or  
their performance instead of taking  
time, effort and study to test and  
verify the truth of all our state-  
ments? How much customer con-  
fidence would we enjoy if we "Let  
the Customer Beware" instead of  
backing every transaction with our  
guarantee of "Goods Satisfactory or  
Money Refunded?"

The name "EATON'S" alone  
doesn't keep our doors open. It's  
our constant study of the needs and  
wishes of our customers, our con-  
stant use of the experience we have  
gained through years of successful  
operations, that ensures the continu-  
ing patronage of satisfied customers.

EATON'S

Miss Terry Walker is spend-  
ing her holidays at Calgary and  
Banff.

Miss Kaja Matheson is leaving  
at the weekend for a short visit  
with friends at Strathmore.

Miss Carol Sellhorn returned  
Sunday from a pleasant holiday  
at Waterton Lakes.

Mr. and Mrs. D. Pickering of  
Spokane, Wash. are at present  
visiting here with their son Wm.  
and family.

Mr. Irving Strobel of Tucson,  
Arizona who has been visiting  
here and in Medicine Hat for  
the past two weeks left for his  
home on Monday.

Mrs. Alf Dutton and children  
of Mountain Park who have  
been holidaying here recently with  
Mrs. Dutton's parents Mr. and  
Mrs. Dacre, left for their home  
on Sunday.

Rev. Mr. Claxton, of Medicine  
Hat, conducted the service in  
Gordon Memorial Church last  
Sunday evening. Next Sunday  
evening the service will be in  
charge of Mrs. Wm. Thacker  
and Mr. Jim Brown.

The Misses Sellhorn of Min-  
neapolis and Duluth who have  
been visiting with Mrs. L. Sel-  
horn here for the past few weeks  
left for Minneapolis Thursday.  
They were accompanied by Miss  
Margaret Sellhorn, who will  
holiday in the east for a time.

Mr. and Mrs. Allanbach had  
with their guests over the week-  
end, Mr. and Mrs. Schilde and  
Mr. and Mrs. Ray Wynn, all of  
Hartshill, Sask. Mrs. Wynn is a  
sister of Mr. Allanbach. The  
party were returning from a  
holiday at Calgary and Banff.
